WOCA Natural Soap

Natural Soap is a purpose-made quality soap, which due to its nourishing properties quickly closes wood pores and protects against dirt and the penetration of liquids.

Natural Soap is ideal for cleaning and maintenance of all oiled wood surfaces. It is especially suitable for floors, furniture, panels and counter tops. Due to the nourishing properties of the Natural Soap the surface is given optimum protection.

Natural Soap White is recommended for light wood species, while Natural Soap Natural is ideal for dark wood. May be used for the cleaning and maintenance of all known oil systems. Natural Soap is available in the container sizes of 1, 2.5, 5 liter containers and in the colors Natural and White.

Tools Required:

2 buckets and a high quality mop.

How to do...

Before a new oiled floor is used, it is recommended to buff it with a coat of Maintenance Paste. The application gives a hard-wearing surface. Oiled floors should be maintained periodically depending on wear. Floors that are exposed to extremely hard wear should be maintained often.

1. Natural Soap White is shaken carefully before use.
2. Mix a cleaning solution with 1/4 cup Natural Soap per gallon of lukewarm water. It is recommended always to work with 2 buckets: one with soapy water and one with rinse water. Clean the floor with minimum quantity of water – leave soapy water on floor briefly in order to dissolve dirt. Remove dirty soapy water with hard wrung out mop or cloth and rinse out in bucket of rinse water.
3. Always wipe floor with soapy water with hard wrung out mop in order to re-establish the protective Natural Soap film.

Tip: Very dirty floors may be cleaned with [Wood Cleaner](#) and subsequently with Natural Soap. Areas with heavy wear may be maintained with [Maintenance Paste](#) after cleaning with Wood Cleaner. Particularly difficult stains may be removed with [Spot Remover](#).
